

Product Information

**VESTAKEEP® 1000 G**

**LOW- VISCOSITY, UNREINFORCED POLYETHER ETHER KETONE**

**VESTAKEEP® 1000 G** is a low-viscosity, unreinforced polyether ether ketone for injection molding.

The semi-crystalline polymer features superior, thermal and chemical resistance. Parts made from VESTAKEEP® 1000 G are of low flammability.

VESTAKEEP® 1000 G can be processed by common injection machines for thermoplastics.

We recommend a melt temperature between 360°C and 380°C during the injection molding process. The mold temperature should be within a range of 160°C to 200°C, preferably 180°C.

VESTAKEEP® 1000 G is supplied as granules in 25 kg boxes with moisture-proof polyethylene liners.

Inside the original and undamaged packaging, the product has a shelf life of at least 2 years when stored in dry rooms at temperatures not exceeding 30°C.

Pigmentation may affect values.

For information about processing VESTAKEEP® 1000 G, please follow the general recommendations in our brochure "VESTAKEEP® PEEK Processing Guidelines".

The values presented are typical or average values, they do not constitute a specification.

**Key Features**

**Industrial Sector**

Automotive and Mobility, Industry and Engineering

**Resistance to**

Fire / burn

**Processing**

Injection molding

**Conformity**

Food contact

**Delivery form**

Pellets, Granules

**Additives**

Unfilled

**Mechanical properties ISO**

Tensile modulus

dry

**3900**

Unit

MPa

## Characteristics

### Applications

Electrical and Electronical, Encapsulation

### Color

Natural color

### Special Characteristics

Semi-crystalline, Low viscosity
