

2014 Version 2

## DECLARATION

According to the recipe of **SABIC<sup>®</sup> PP compound 9150 in all colours** SABIC does not intentionally use or add substances as such in a concentration above the threshold limit indicated in the:

- Ford Engineering Material Specification WSS-M99P9999-A1 of March 2009
- GM Worldwide Engineering Standard GMW3059 (May 2007)
- PSA norm B20 0250 of December 2009
- Renault standard 00-10-050/--H of March 2010
- Toyota Engineering Standard TSZ0001G of September 2011
- VDA norm 232-101 as available on 14-7-2010 on [http://www.ecodesignguide.dk/html\\_pages/pdf\\_files/vda\\_declarable\\_subst.pdf](http://www.ecodesignguide.dk/html_pages/pdf_files/vda_declarable_subst.pdf)
- GADSList version V1.0 of February 2014

Although the above-mentioned substances as such are not intentionally added to this/these material(s), and the absence has not been checked by tests, this does not exclude the presence of negligibly slight traces due to, amongst others, impurities in the components supplied by external parties and used in the production of such components.

It has to be recognized that with respect to the heavy metals cadmium, lead, mercury and chromium hexavalent, the chemical composition of this material complies with the requirements for heavy metals of the EC Commission Directive 2000/53/EC (and amendments) on the End of Life of Vehicles.

This information applies to the material as produced in our production facilities and does not cover any additive, pigment, etc., subsequently used or added by the buyer (or a third party).

This declaration replaces all previous ones relating to this subject matter and is, unless revoked in writing, valid for a period of 1 (one) year as of the date of issuance, after which it will automatically expire.

2014 Version 2

This declaration replaces all previous ones relating to this subject.

In the name of SABIC Petrochemicals BV,

A handwritten signature in blue ink, appearing to read 'M. Bosma', is positioned above the printed name.
