According to the requirements of Article 6(3) of the EU REACH regulation, any manufacturer or importer of a polymer that comprises more than 2% of (a) chemically bound monomer(s) in a volume exceeding 1000 kg per year has to register the monomer(s) used. SABIC appointed its affiliate SABIC Petrochemicals B.V. based in the Netherlands to fulfil its tasks and responsibilities for complying with the legal requirements of the EU REACH regulation. SABIC Petrochemicals B.V., representing SABIC, has successfully registered the monomer(s) used in the SABIC Product under the EU REACH regulation.

Plastic materials, such as produced by SABIC are mixtures (preparations) (the polymer part, residual monomer, additives, etc.). According to the EU REACH regulation preparations do not need to be registered separately, provided that the individual parts of the mixture are (pre)-registered.

For substances for which SABIC is a Downstream User, and thus has no registration obligation itself, SABIC has contacted its suppliers and confirmed that all their registration obligations under the EU REACH regulation have been met. SABIC will not use any product or will do business with a supplier that is not in compliance with the EU REACH regulation. SABIC Petrochemicals B.V., representing SABIC, has registered all (imported) substances for which there was a registration obligation and will continue to ensure SABIC's regulatory compliance with the EU REACH regulation.

It has to be noted that the EU REACH registration of the substance(s) subject to registration in the SABIC Product is restricted to the product as manufactured by SABIC in the EU or imported by SABIC Petrochemicals B.V. and cannot be used by or relied upon by any third party.

This SABIC Product is not a dangerous preparation according to the requirements of EU Regulation (EC) 1272/2008 on the classification, labelling and packaging of substances and mixtures, and its amendments. Therefor the SABIC Product is not subject to the requirements of Article 31(1) and 31(2) of the EU REACH regulation. As a result SABIC has no legal obligation to set up a Safety Data Sheet according to Article 31 (6) and Annex II of the EU REACH regulation and the fact that SABIC issues such a Safety Data Sheet should be regarded as information provided on a voluntary basis as part of SABIC's responsible care efforts. It should be observed that a Safety Data Sheet, issued by SABIC, does not always contain all of the mandatory information on the use and application of a SABIC Product or other information derived from the EU REACH notification of the SABIC Product.

Regarding the presence of Substances of Very High Concern, we can inform you as follows:

According to the recipe in the production of the SABIC Product, SABIC does not intentionally add:

- Substances of Very High Concern (SVHC), included in the most recent and authentic "Candidate List of Substances of Very High Concern for Authorisation", in a concentration above the threshold limit of 0.1%, as published by the European Chemicals Agency (ECHA) on <http://echa.europa.eu/web/guest/candidate-list-table>, dated June 14, 2023 (List of 235 substances)
- Substances subject to the provisions of Annex XIV (Authorisation) or Annex XVII (Restriction) of the EU REACH regulation, and its amendments.

DISCLAIMER: THE MATERIALS, PRODUCTS AND SERVICES OF SAUDI BASIC INDUSTRIES CORPORATION (SABIC) OR ITS SUBSIDIARIES OR AFFILIATES ("SELLER") ARE SOLD SUBJECT TO SELLER'S STANDARD CONDITIONS OF SALE, WHICH ARE AVAILABLE UPON REQUEST. INFORMATION AND RECOMMENDATIONS CONTAINED IN THIS DOCUMENT ARE GIVEN IN GOOD FAITH. HOWEVER, SELLER MAKES NO EXPRESS OR IMPLIED REPRESENTATION, WARRANTY OR GUARANTEE (i) THAT ANY RESULTS DESCRIBED IN THIS DOCUMENT WILL BE OBTAINED UNDER END-USE CONDITIONS, OR (ii) AS TO THE EFFECTIVENESS OR SAFETY OF ANY DESIGN OR APPLICATION INCORPORATING SELLER'S MATERIALS, PRODUCTS, SERVICES OR RECOMMENDATIONS. UNLESS OTHERWISE PROVIDED IN SELLER'S STANDARD CONDITIONS OF SALE, SELLER SHALL NOT BE RESPONSIBLE FOR ANY LOSS RESULTING FROM ANY USE OF ITS MATERIALS, PRODUCTS, SERVICES OR RECOMMENDATIONS DESCRIBED IN THIS DOCUMENT. Each user is responsible for making its own determination as to the suitability of Seller's materials, products, services or recommendations for the user's particular use through appropriate end-use and other testing and analysis. Nothing in any document or oral statement shall be deemed to alter or waive any provision of Seller's Standard Conditions of Sale or this Disclaimer, unless it is specifically agreed to in a writing signed by Seller. Statements by Seller concerning a possible use of any material, product, service or design do not, are not intended to, and should not be construed to grant any license under any patent or other intellectual property right of Seller or as a recommendation for the use of any material, product, service or design in a manner that infringes any patent or other intellectual property right. - Substances listed in the UK REACH Candidate List of Substances of Very High Concern (SVHCs) for Authorisation in accordance with Article 59(10) of UK REACH.

Although these substances as such are not intentionally added to the SABIC Product, and the absence has not been checked by tests, this does not exclude the presence of negligibly slight traces due to, amongst others, impurities in the components supplied by external parties and used in the production of such components.

This SABIC Product may contain residual traces of a phthalate¹, originating from the catalyst system used in its manufacturing process. Since these residual traces are not intentionally added by SABIC to the SABIC Product to achieve a technical effect in the final article, they are regarded by SABIC as an impurity². According to the ECHA Guidance on registration (V.2.0 of May 2012), impurities are exempted from the obligation to register and are therefore not subject to Authorisation or Restriction.

Moreover, the content of the residual phthalate present in the SABIC Product is far below the lowest concentration limit as specified in:

- Annex I of Regulation (EC) No. 1272/2008 of the European Parliament and the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures, amending and repealing Directives 67/548/EEC and 1999/45/EC, and amending Regulation (EC) 1907/2006, which result in the classification of materials as hazardous. According to Article 56(6)(b) of REACH such concentrations are **exempted** from Authorisation.
- Annex XVII (Restriction) of the Regulation (EC) No 1907/2006 incl. amendments.

Therefore, SABIC considers above-mentioned use of phthalates not subject to the requirements of Annex XIV (Authorisation) and/or Annex XVII (Restriction) of the EU REACH regulation, and its amendments.

¹ The identity of this substance is subject to confidentiality provisions of SABIC.

² ECHA Guidance for identification and naming of substances under REACH and CLP (V.2.0 of March 2012):
"Impurity: An unintended constituent present in a substance as manufactured. It may originate from the starting materials or be the result of secondary or incomplete reactions during the manufacture process. While it is present in the final substance it was not intentionally added".

Status of SABIC Product with respect to Phthalates / Endocrine Disruptors / CMR substances / Cosmetics Regulation / EuPIA Exclusion Policy

We can inform you that this SABIC Product contains residual traces of a phthalate, originating from the catalyst system used in its manufacturing process.

The used phthalate is allowed as a *"technical support agent in polyolefins in concentrations up to 0.05 % in the final product"* according to Commission Regulation (EU) 10/2011 on materials and articles intended to contact food. The residual phthalate traces fully comply with the applicable requirements listed in that regulation and in Regulation 2005/84/EC on phthalates in toys and childcare articles (repealed by Commission Regulation (EU) no 2018/2005).

Version: August 16 , 2023

These residual phthalate traces are not subject to authorization and Annex XIV (Authorisation List) of European Regulation (EC) No 1907/2006 incl. amendments (see Status of SABIC Product with respect to REACH Registration / SVHC / ANNEX XIV / ANNEX XVII).

According to the recipe in the production, the SABIC Product does not contain substances listed by the following lists or regulations, except for above-mentioned residual traces of a phthalate:

- Substances listed in the Endocrine Disruptor Lists I, II and III (www.edlists.org; latest update April 2022). That also covers substances referred to in item I and II of Article L. 5232-5 of the Public Health Code, France.
- Substances classified as CMR (all categories) according to the Regulation (EC) 1272/2008 on the classification, labelling and packaging of substances and mixtures and its amendments, except for authorised substances as referred to in Articles 5 and 6 of EU Commission Regulation (EU) No 10/2011 on plastic materials and articles intended to come into contact with food, and its amendments.
- “Substances prohibited in cosmetic products” as listed in Annex II or “Substances which cosmetic products must not contain except subject to the restrictions laid down” as listed in Annex III of EU Regulation (EC) No 1223/2009/EC on cosmetic products including amendments up to and including Commission Regulation (EU) 2022/2195 of 10 November 2022.
- Substances (Group A – G) as listed in the EuPIA Exclusion Policy for printing inks and related products, 4th Edition of March 2021.

Status of SABIC Product with respect to California Proposition 65

According to the recipe in the production of the SABIC Product, the following substance(s) as such is / are not intentionally added:

- Substances (at levels resulting in exceedance of indicated safe harbor levels) mentioned in the list of chemicals known to cause cancer or reproductive toxicity (Safe Drinking Water and Toxic Enforcement Act of 1986) of the California Proposition 65, updated August 11, 2023.

According to the recipe in the production, the trace residuals of a phthalate originating from the catalyst system used in the polymerization process do not exceed indicated safe harbor levels.

Status of SABIC Product with respect to Animal origin, TSE/BSE, Kosher/Halal

According to the recipe in the production of the SABIC Product, the following substances as such are not intentionally added:

- alcohol

The absence has not been checked by tests.

It has to be recognized that the SABIC Product is not produced in an exclusive "Halal or Kosher Certified" surrounding.

We have to inform you that according to the recipe in the production of the SABIC Product, substances of bovine origin are used.

Our suppliers have informed us that in line with Commission Regulation (EU) No. 142/2011 of 25 February 2011 implementing Regulation (EC) No. 1069/2009, the sourced fats are coming from BSE free countries or are obtained exclusively from class 3 animal by-products.

During the production process, the fats undergo:

- a hydrogenation process at temperature above 220° C for at least 120 minutes at more than 15 bars
- a hydrolysis or hydrolytic reaction at a temperature above 200° C for at least 120 minutes at 20 bars.

It is the opinion of our suppliers that their process fully exceeds the conditions recommended by:

- Note for guidance on minimising the risk of transmitting animal spongiform encephalopathy agents via human and veterinary medicinal products (EMA/410/01 rev. 3)
- CPMP (Committee for Proprietary Medical Products) in guideline BWP/5136/03 of 21 October 2004 and amendments
- Scientific Committee on Cosmetology of 24 June 1997 and the conditions mentioned in Annex VI chapter III of Regulation (EC) No. 1774/2002
- Annex II of Commission Directive 2000/6/EC of 24 January 2000

Based on this information there is no reason for SABIC to take action or to switch its source of supply, unless it is requested to do so by authorities in order to guarantee absence of animal-based derivatives in the additives used.

Status of SABIC Product with respect to Per- and PolyFluorinated Alkyl Substances (PFAS)
