

SABIC® HDPE F00952

HIGH DENSITY POLYETHYLENE

DESCRIPTION

SABIC® HDPE F00952 resin is a high molecular weight High Density Polyethylene copolymer which has been designed specifically for blown film extrusion. It has broad molecular distribution and high density combine successfully to give excellent extrudability with high film strength and rigidity. The material contains anti oxidant. Application SABIC® HDPE F00952 resin is recommended for blown film extrusion. This product is suggested for the manufacture of high strength grocery sacks, shopping bags and high quality thin films for multi wall sack liners and replacement for thin paper products. Films of this product are readily treated and printed to give high quality graphics. Processing conditions SABIC® HDPE F00952 can be extruded on conventional HMW-HDPE equipment at melt temperatures between 200 and 235 °C. Film properties Film properties have been measured at 15 µm blown film with a BUR = 4.
