

SABIC® LLDPE P438J

LINEAR LOW DENSITY POLYETHYLENE FOR EXTRUSION

DESCRIPTION

P438J is a medium density LLDPE natural resin and TNPP free designed for extrusion applications. This grade combines stiffness, toughness, high melt strength and low gel content coupled to excellent processability due to its tailored molecular weight distribution and flow properties. It contains an optimized level of stabilizers and is free from any slip or anti-block additives.

TYPICAL APPLICATIONS

Cylindrical and tape drip irrigation pipes. This grade is also suitable for other extrusion applications such as Medium and Low Voltage Cable Sheathing, electrical conduits, thin wall tubes and blown film extrusion.
