## SABIC® PPcompound Elastomer modified Polypropylene (PP-EPDM) mineral filled

# Identification of the substance/preparation and company/undertaking

**Product name** SABIC® PPcompound Elastomer modified Polypropylene (PP-EPDM) mineral filled

Polypropylene, EPDM and mineral modified Chemical product name

> SABIC Europe B.V. P.O. Box 5151 6130 PD Sittard The Netherlands

**Emergency telephone** 

Supplier

The Netherlands: +31 (0)46 476 55 55

Recommended use : Industrial parts.

## Composition/information on ingredients

Substance/preparation

Within the present knowledge of the supplier, this product does not contain any hazardous ingredients in quantities requiring reporting in this section, in accordance with EU or national regulations.

### Hazards identification

**Human health hazards** Dust may cause mechanical irritation. Heated material can cause thermal burns.

**Environmental hazards** Based on the available data of this product no hazardous properties are known.

Physical/chemical hazards Combustible.

#### 4. First-aid measures

Effects and symptoms

Inhalation : Over-exposure by inhalation may cause respiratory irritation. (coughing)

There is no known acute effect after over-exposure to this product. Ingestion

Skin contact Heated material can cause thermal burns resulting in pain, redness, blistering.

Eye contact May cause eye irritation. (redness).

First-aid measures

Inhalation If inhaled, remove to fresh air. Obtain medical attention if symptoms occur.

Ingestion If swallowed, rinse mouth with water (only if the person is conscious). Obtain medical attention if

symptoms occur.

Rinse with plenty of running water. Get medical attention. Skin contact

Eye contact Rinse with plenty of running water. Obtain medical attention if symptoms occur.

First aid facilities No special recommendations.

#### Fire-fighting measures 5.

Extinguishing media

**Small fire** 

Suitable : Use dry chemical or CO<sub>2</sub>.

Large fire

Suitable Use water, foam or dry chemical powder.

Unusual fire/explosion

hazards

No specific hazard.

**Hazardous thermal** decomposition products : In case of fire, may produce hazardous decomposition products such as carbon monoxide, carbon dioxide, (dense) black smoke, aldehydes, Organic acids.

Fight fire from protected location or maximum possible distance. Keep the area surrounding the fire

Special fire-fighting procedures

cool. Avoid contact with heated material.

Protection of fire-fighters

: Wear suitable protective clothing. Self-contained breathing apparatus.

The material burns slowly with high smoke density and flaming drips. Fine powder forms flammable Remarks and explosive mixtures in air. Use water spray to keep fire-exposed containers cool.

Date of issue: 11 July 2005 Version:5 Page: 1/4 Safety Data Sheet

opylene (PP-

### Accidental release measures

: Avoid creating dusty conditions and prevent wind dispersal. Use suitable protective equipment Personal precautions

(section 8). Keep away from sources of ignition. Take precautionary measures against static

discharges. Use explosion-proof electrical (ventilating, lighting and material handling) equipment.

**Environmental precautions** : No special measures required.

Clean-up Methods

Small spill and leak

: Vacuum or sweep up material and place in a designated labelled waste container. Clean up affected

area with a large amount of water.

Large spill and leak : Use explosion-proof electrical (ventilating, lighting and material handling) equipment.

Note: see section 8 for personal protective equipment and section 13 for waste disposal.

### Handling and storage

Handling : Use with adequate ventilation. Local exhaust ventilation should be provided. Avoid creating dusty

> conditions and prevent wind dispersal. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Take measures against static discharge. Keep away from sources of

ignition.

**Storage** Store in a fireproof location. Keep away from incompatible materials and avoid specific conditions

(See section 10). Containers should be grounded. Do not stack more than 2 pallets high in connection with risk of falling over. Keep in a dry place. Protect from (sun)light. Take precautionary

measures against electrostatic discharges.

: Do not store above 80 °C. Storage temperature

Remarks Precautions should be taken to prevent the formation of dusts in concentrations above flammable,

explosive or occupational exposure limits. Avoid the creation of dust when handling and avoid all

possible sources of ignition (spark or flame).

Note: See section 10 for stability and reactivity

#### 8. Exposure controls/personal protection

: Use only with adequate ventilation. Local exhaust ventilation should be provided. Use explosion-**Engineering measures** 

proof electrical (ventilating, lighting and material handling) equipment.

When using do not eat, drink or smoke. Wash hands after handling compounds and before eating, Hygiene measures

smoking, using lavatory, and at the end of day.

Personal protective equipment - Production scale

Respiratory system : Wear dust protection mask P2.

Skin and body Working clothes.

**Eyes** : Safety glasses with side shields.

Hands When handling hot material, wear heat-resistant protective gloves that are able to withstand the

temperature of molten product.

Remarks : A face shield must be worn in work involving spattering if a full mask is not required. In this case,

other recommended use of eye protection is not required.

Advice on personal protection is applicable for high exposure levels. Select proper personal protection based on a risk assesment of the actual exposure situation.

#### 9. Physical and chemical properties

Physical state Solid. (Granular solid.)

Off-white. Colour Odour Paraffin-like **Melting point** 145 to 170 °C Flash point >360 °C Lower explosion limit : Not available. Upper explosion limit Not available. : > 365 °C **Auto-ignition temperature** 

: 0.96 to 1.25 g/cm<sup>3</sup> Density (g/cm³) : 650 to 970 kg/m<sup>3</sup> **Bulk density** : Insoluble in cold water Solubility

Minimum ignition 440 °C

temperature

opylene (PP-

# 10. Stability and reactivity

Stability : Stable under recommended storage and handling conditions (see section 7).

Keep away from heat, sparks and flame. Take measures against static discharge. Exposure to (sun) Conditions to avoid

light. Prevent formation of dust clouds.

Materials to avoid oxidising agents.

**Hazardous decomposition** 

products

: Highly dependent on temperature and environmental conditions, a variety of decomposition products may be formed, such as low molecular weight hydrocarbons and hydrocarbon oxidation products

(acids, ketons, aldehydes).

Remarks : At processing temperatures some degree of thermal degradation may occur.

## 11. Toxicological information

#### **Acute toxicity**

Ingredient name	Test	Species	Route	Result
Polypropylene, EPDM and mineral modified	LD <sub>50</sub>	Rat	Oral	>5000 mg/kg

#### Chronic toxicity

Remarks During heating and processing of the material small amounts of free monomer may evaporate

resulting in airborne concentration that may cause irritating effects of the respiratory tract and

Note: See section 4 for effects and symptoms

## 12. Ecological information

**Ecotoxicity data** : Not available

Ingredient name	Aquatic half-life	Photolysis	Biodegradability
Polypropylene, EPDM and mineral modified	-	-	Not readily

**Mobility** : For data on physical state and solubility see section 9.

## 13. Disposal considerations

Methods of disposal (waste of residues; contaminated

: Waste must be disposed of in accordance with national and local environmental regulations.

## 14. Transport information

**General information** 

packaging)

**UN** number : Not regulated.

# 15. Regulatory information

**EU** regulations

Risk phrases : This product is not classified according to the EU regulations.

#### Notice to reader

All information supplied by or on behalf of the SABIC Europe companies in relation to its products, whether in the nature of data, recommendations or otherwise, is supported by research and believed reliable, but the relevant SABIC Europe company assumes no liability whatsoever in respect of application, processing or use made of the afore-mentioned information or products, or any consequence thereof. The user undertakes all liability in respect of the application, processing or use of the afore-mentioned information or product, whose quality and other properties he shall verify, or any consequence thereof. No liability whatsoever shall attach to any of the SABIC Europe companies for any infringement of the rights owned or controlled by a third party in intellectual, industrial or other property by reason of the application, processing or use of the afore-mentioned information or products by the user.

None of the materials referenced herein should be used and/or applied in any product, device or material used or for use as human body implant or otherwise within the human body.

**Training advice** : Before handling this substance/preparation, the personnel involved should be instructed by means of

this safety data sheet.

Sources of key data : Literature data and/or investigation reports are available at the manufacturer.

Alterations compared to the

previous version

: Alterations compared to the previous version are marked with a little (blue) triangle.
