

SAFETY DATA SHEETNorth America U.S. GHS Format

Print date: 24-Mar-2015 Revision Number: 2 Revision date: 24-Mar-2015

1. IDENTIFICATION OF THE SUBSTANCE AND COMPANY

Trademark: Product Code:	LUBRICOMP™ ZX05506 - BKNAT
Product Description:	Modified Polyphenylene oxide [CASRN 25134-01-4]
Product Type:	Commercial Product
Recommended use:	May be used to produce molded or extruded articles or as a component of other industrial products.
Company:	SABIC Innovative Plastics US LLC One Plastics Avenue Pittsfield, MA 01201 USA (413) 448-5800 www.sabic-ip.com
Manufacturer:	SABIC Innovative Plastics US LLC 251 South Bailey Road Thorndale, Pennsylvania 19372 United States
Emergency Telephone Number:	800/447-4545
Emergency Transportation/CHEMTREC (24 HOUR):	800 424-9300 (USA) +1 703-527-3887 (globally, outside USA)
E-mail:	productinquiries@sabic-ip.com
Website Address:	www.sabic-ip.com

Product Name: LUBRICOMP ZML-4334 BK8-950 Page 1 of 11 Revision date: 24-Mar-2015

2. HAZARDS IDENTIFICATION

The additives in this product are bound in a thermoplastic resin matrix. In accordance with GHS for the classification of the product, the hazard potential may be assessed with respect to the physico-chemical form and/or bioavailability of the individual components in the thermoplastic resin.

Where GHS classifications are shown below, these are based on the individual components in the thermoplastic resin matrix. Under the typical use conditions for the resin, these hazardous components are unlikely to contribute to workplace exposure. Please read the entire safety data sheet and/or consult an EHS professional for a complete understanding.

Classification

OSHA Regulatory Status

This product is not considered hazardous by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200)

Route of exposure, mechanistic information and metabolism studies are pertinent to determining the relevance of an effect in humans (GHS section 1.3.2.4.9.4). Where appropriate, GHS classification can be specified as route-dependent. The presence of the White Mineral Oil does not lead to the thermoplastic pellets having a viscosity in the range of concern for aspiration hazard.

GHS-Labeling

Emergency Overview

Not classified

The product contains no substances which at their given concentration, are considered to be hazardous to health

Appearance: Pellets Physical State: Solid Odor: Slight

Hazards not otherwise classified (HNOC)

Not applicable

Other Information

Not applicable

Other hazards which do not result in classification:

SABIC Emergency Overview

- Pellets with slight or no odor
- · Spilled material may create slipping hazard
- · Can burn in a fire creating dense, toxic smoke
- Molten plastic can cause severe thermal burns
- Fumes produced during melt processing may cause eye, skin, and respiratory tract irritation. Severe over-exposure may result in nausea, headache, chills, and fever. See below for additional effects.
- Secondary operations, such as grinding, sanding, or sawing can produce dust which may present an explosion or respiratory hazard.

Other Information: Cool skin rapidly with cold water after contact with molten material. Heating can release

hazardous gases. Hazardous fumes can also occur in post-processing operations.

Processing Issues: Processing vapors may cause irritation to the eyes, skin, and respiratory tract. In cases of

severe exposure, nausea and headache can also occur. Grease-like processing vapor condensates on ventilation ductwork, molds, and other surfaces can cause irritation and

injury to skin.

Product Name: LUBRICOMP ZML-4334 BK8-950 Page 2 of 11 Revision date: 24-Mar-2015

Aggravated Medical Conditions:

MEDICAL RESTRICTIONS: There are no known health effects aggravated by exposure to this product. However, certain sensitive individuals and individuals with respiratory impairments may be affected by exposure to components in the processing vapors.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Product Type

Mixture

HAZARDOUS COMPONENTS:

Chemical Name	CAS Number	Weight %
Silica quartz (SiO2)	14808-60-7	10 - 30
Graphite	7782-42-5	10 - 30
White paraffin oil (petroleum)	8042-47-5	1 - 5

The non-hazardous components and exact percentage (concentration) of the composition have been withheld as a trade secret.

This product consists primarily of high molecular weight polymers which are not expected to be hazardous. The ingredients in this product are present within the polymer matrix and are not expected to be hazardous.

4. FIRST AID MEASURES		
If Inhalation:	Move to fresh air in case of accidental inhalation of fumes from overheating or combustion. Processing fumes inhalation may be irritating to the respiratory tract. If symptoms are experienced remove victim from source of contamination or move victim to fresh air and obtain medical advice. If symptoms persist, call a physician.	
On skin contact:	Immediately cool the skin by rinsing with cold water after contact with hot material. Wash off immediately with soap and plenty of water. If skin irritation persists, call a physician.	
On contact with eyes:	Immediately flush with plenty of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. If eye irritation persists, consult a specialist.	
On ingestion:	Not probable due to nature of the product. If a large amount of pellet material is swallowed, consult a physician for medical treatment.	
Precautions:	Cool molten product on skin with plenty of water. Do not remove solidified product. Do not peel polymer from the skin.	

Product Name: LUBRICOMP ZML-4334 BK8-950 Page 3 of 11 Revision date: 24-Mar-2015

5. FIRE-FIGHTING MEASURES

Autoignition Temperature: 490 °C (914°F), estimated

Explosive Properties: Avoid generating and accumulating dusts; fine dust dispersed in

air in sufficient concentrations, and in the presence of an ignition

source is a potential dust explosion hazard.

Suitable Extinguishing Media: Use dry chemical, CO2, water spray or "alcohol" foam. Water is

the best extinguishing medium. Carbon dioxide and dry chemical are not generally recommended because their lack of cooling capacity may permit re-ignition on larger resin fires (blobs, drools,

etc.).

Unsuitable Extinguishing Media for Safety Reasons: Do not use a solid water stream as it may scatter and spread fire.

Special Protective Equipment for Firefighters: In the event of fire, wear self-contained breathing apparatus.

Specific Hazards: Thermal decomposition can lead to release of irritating gases and

vapors.

6. ACCIDENTAL RELEASE MEASURES

Clean up: Sweep up and shovel into suitable containers for disposal. Do not

create a powder cloud by using a brush or compressed air.

Personal Precautions: See section 8.

Environmental Precautions: Do not flush into surface water or sanitary sewer system. Material

should not be released into the environment.

7. HANDLING AND STORAGE

Handling: Handle in accordance with good industrial hygiene and safety

practices. Provide for appropriate exhaust ventilation and dust collection at machinery. Avoid dust formation. All metal parts of

the mixing and processing equipment must be earthed.

Storage: Keep containers tightly closed in a dry, cool and well-ventilated

place. Keep away from heat sources and sources of ignition.

Incompatible Products: No special restrictions on storage with other products.

Product Name: LUBRICOMP ZML-4334 BK8-950 Page 4 of 11 Revision date: 24-Mar-2015

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure limits:

No components with information, unless noted below

Chemical Name	US OSHA PEL (8 Hr)	ACGIH	Canada - Alberta (8 Hr)	Mexico OEL Data	SABIC Recommend (8 Hr)*
Silica quartz (SiO2) 14808-60-7	FRL_TWA: 0.1 mg/m³ respirable dust; TL_PEL: as quartz, See Table Z-3	0.025 MGM3 Respirable fraction.	Carcinogenicity: A2 ; OEL_8 hr: 0.025 mg/m³ Respirable particulate	LMPE-PPT: 0.1 mg/m ³ ; CONN: (j)	No Information
Graphite 7782-42-5	FRL_TWA: 2.5 mg/m³ respirable dust ; TL_PEL: See Table Z-3	Respirable fraction - TWA: 2 mg/m³; Crit Eff: Pneumoconiosis	OEL_8 hr: 2 mg/m³ Respirable	LMPE-PPT: 2 mg/m³; CONN: (j) LMPE-PPT: 10 mg/m³; CONN: (j)	No Information
White paraffin oil (petroleum) 8042-47-5	FRL_TWA: 5 mg/m³; TL_PEL: 5 mg/m³	No Information	No Information	LMPE-PPT: 5 mg/m ³ ; LMPE-CT: 10 mg/m ³	No Information

^{*}SABIC Recommended Exposure Limits have been established for certain chemicals.

Engineering Measures to Exposure: In the case of hazardous fumes, wear self-contained breathing

apparatus. Wear face-shield and protective suit for abnormal processing problems. Handle in accordance with good industrial hygiene and safety practice. Provide for appropriate exhaust

ventilation at machinery.

Hand Protection: Protective gloves should be worn

Eye Protection: Safety glasses with side-shields.

Respiratory Protection: In the case of hazardous fumes, wear self contained breathing

apparatus. In case of insufficient ventilation wear suitable

respiratory equipment.

Body Protection: Long sleeved clothing

Hygiene Measures: When using, do not eat, drink or smoke.

Product Name: LUBRICOMP ZML-4334 BK8-950 Page 5 of 11 Revision date: 24-Mar-2015

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical State: Solid Appearance: Pellets

Color: Same as color code

Odor: Slight

Odor Threshold: No information available

pH No data available
Boiling point/range: Not determined

Melting point/range: This product does not exhibit a sharp melting point but softens

gradually over a wide range of temperatures.

Autoignition Temperature: 490 °C (914°F) estimated No information available

 Vapor Pressure:
 Negligible

 Water Solubility:
 Insoluble

 Postition and finite interesting and i

Partition coefficient:

Vapor Density:Not determinedEvaporation Rate:Negligible

Decomposition temp. (°C):Not determinedSpecific gravity:>1; (water = 1)VOC content (%):Negligible

Explosive Limits

upper: Not determined lower: Not determined

10. STABILITY AND REACTIVITY

Stability: Stable under ambient conditions. Hazardous polymerization does

not occur.

Conditions to Avoid:

Avoid temperatures above 490 °C without adequate ventilation.

To avoid thermal decomposition, avoid elevated temperatures. Heating can result in the formation of gaseous decomposition

products, some of which may be hazardous.

Hazardous Decomposition Products: Traces of, styrene, toluene, styrene dimers, aliphatic amines,

aldehydes and alcohols, ethylbenzene and 4-vinylcyclohexene, hydrogen fluoride, carbonyl fluoride, perfluorohydrocarbon

fragments.

Incompatible Products: None known

Product Name: LUBRICOMP ZML-4334 BK8-950 Page 6 of 11 Revision date: 24-Mar-2015

11. TOXICOLOGICAL INFORMATION

Acute Toxicity

LD50/oral/rat: >5000 mg/kg

LD50/dermal/rabbit: >2000 mg/kg

Inhalation: Pellet inhalation unlikely due to physical form. Processing fumes from PPE resin are not

considered toxic. In acute inhalation tests, laboratory rats were exposed to processing fumes at concentrations exaggerating those that would likely occur in workplace situations. During the exposure periods (6 hour duration) signs of eye and nasal irritation were

observed. These signs of irritation disappeared shortly after the animals were removed from the exposure chamber. No deaths or signs of toxicity were noted during the fume exposure period. There were no distinct or consistent treatment related tissue or organ changes noted in gross necropsies. Processing fumes from PPE resin are not considered toxic. In acute inhalation tests, laboratory rats were exposed to processing fumes at concentrations exaggerating those that would likely occur in workplace situations. During the exposure periods (6 hour duration) signs of eye and nasal irritation were observed. These signs of irritation disappeared shortly after the animals were removed from the exposure chamber. No deaths or signs of toxicity were noted during the fume exposure period. There were no distinct or consistent treatment related tissue or organ changes noted in gross necropsies.

Eye Contact: Resin particles, like other inert materials, are mechanically irritating to eyes.

Skin Contact: Not a hazard with pellets during normal industrial use.

Ingestion: Pellet ingestion unlikely due to physical form.

Chronic Toxicity: No information available.

Subchronic Toxicity: No information available

In a 13 week dust inhalation study, laboratory rats were exposed to up to 50 mg/m³ PPE dust for 6 hrs/day for 13 weeks with a 13-week non-exposure recovery period. There was no evidence of systemic toxicity at the highest dose. Localized toxicity was observed in the

lungs and regional lymph nodes of the 50 mg/m³ exposure group. These findings

decreased in severity in the 7 and 1 mg/m³ exposure groups. A no adverse effect level for PPE is estimated to be 7 mg/m³ and a no observable effect level is 1 mg/m³.

Primary Irritation: Substance does not generally irritate and is only mildly irritating to the skin.

Remarks: The toxicological data has been taken from products of similar composition.

Product Name: LUBRICOMP ZML-4334 BK8-950 Page 7 of 11 Revision date: 24-Mar-2015

Special Studies:

Waste Disposal:

Polyphenylene ether: In two independent 2 year dietary studies, purebred beagles and laboratory rats were fed polyphenylene ether resin powder (up to 10% by weight in the animal diet). In both studies, there were no adverse effects on physical appearance, behavior, growth, food consumption, survival, clinical laboratory results, organ weights or gross or microscopic pathology. In a 6 month chronic inhalation study, rats and guinea pigs exposed 6 hrs/day to up to 300 mg/m³ PPE dust developed no physical, nutritional, hematologic, clinical or pathological reaction except to lung tissue changes which consisted of macrophage accumulation, many of which were degenerative in the pulmonary alveoli. Polyphenylene ether is not a mutagen by Ames (Salmonella) Assay with and without activation.

Thermal degradation of the fluoropolymer additives in this product may result in the release of pyrolysis products and fumes. Short term inhalation exposure may cause influenza-like symptoms such as chest pain/tightness, shortness of breath, sore throat, fever and chills, malaise and sometimes headache (also known as "polymer fume fever"). Following removal from exposure, complete resolution is expected within 12-48 hours. Prolonged and repeated exposure to high levels may lead to effects such as pulmonary edema and lung disease.

Graphite: Allergic dermatitis has been reported. Excessive concentration of nuisance dusts in the workroom may cause unpleasant deposits on the skin and in the ears. Some evidence suggests that simple and complicated pneumonoconiosis similar to that seen in coal workers may occur with repeated exposure.

12. ECOLOGICAL INFORMATION

Ecotoxicity Effects: Do not flush into surface water or sanitary sewer system.

Other information: Ecological damages are not known or expected under normal use

13. DISPOSAL CONSIDERATIONS

Contaminated Packaging: Empty containers should be taken for local recycling, recovery or waste disposal.

waste dispos

Recycling is encouraged. Landfill or incinerate in accordance with federal, state and local requirements. Collected processing fume condensates and incinerator ash should be tested to determine waste classification.

15. REGULATORY INFORMATION

International Inventories:

TSCA (USA): Listed DSL (Canada): Listed **EINECS/ELINCS (Europe):** Listed ENCS (Japan): Listed IECSC (China): Listed KECL (Korea): Listed PICCS (Philippines): Listed AICS (Australia): Listed NZIoC (New Zealand): Listed

Other Inventory Information:

A "Listed" entry above means all chemical components are on the respective inventory list and/or a qualifying exemption exists for one or more components. A "Not listed" entry above indicates one or more components is restricted from import or manufacture into that country/region. Articles are exempt from registration and are therefore not listed on the national chemical inventories.

SVHC (REACH Regulation (EC) No 1907/2006 and 453/2010, as amended):

This product does not intentionally contain SVHC chemicals except as noted below. Incidental amounts of impurities, if present, would be below the threshold limit of 0.1% by weight.

SARA (313) Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA):

This product does not contain any chemicals which are subject to the reporting requirements of the Act and Title 40 of the Code of Federal Regulations, Part 372.

SARA (311, 312) hazard class:

Acute Health Hazard	N
Chronic Health Hazard	N
Fire Hazard	N
Sudden Release of Pressure Hazard	N
Reactive Hazard	N

Canada - WHMIS Classification:

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the SDS contains all the information required by the CPR. Unless noted below, this product is non-controlled. Some classifications may not apply to the entire product.

California Proposition 65:

Components in this product known to the State of California to cause cancer and/or reproductive effects, are listed below:

Chemical Name	Weight %	California Proposition 65:
Silica quartz (SiO2) 14808-60-7	10 - 30	Listed: October 1, 1988 Carcinogenic.
Toluene 108-88-3	0.01 - 0.10	Type of Toxicity: female ; Type of Reproductive Toxicity: developmental
Carbon black 1333-86-4	<100 ppm	Listed: February 21, 2003 Carcinogenic. (airborne, unbound particles of respirable size)

RoHS EU Directive 2011/65/EU:

The subject product is in compliance with EU RoHS Directive 2011/65/EU. All below chemicals are not employed in the manufacture of the product: a.Cadmium and its compounds, b.Lead and its compounds, c.Mercury and its compounds, d.Hexavalent chromium compounds, e.Polybrominated biphenyls (PBBs), f.Polybrominated diphenyl ethers (PBDEs including Deca-BDE). The trace levels of heavy metals may be present as impurities within threshold limits (<0.1% for Pb, Hg, Cr VI, and <0.01% for Cd). We are disclosing this information, to the best of our knowledge, based upon data from our raw material manufacturers.
