

Lupolen 4261A IM

Polyethylene, High Density

Product Description

Lupolen 4261 A IM is a high molecular High Density Polyethylene (HDPE) typically used by our customers for components of automotive fuel tank applications. It is supplied in pelletised form and is stabilised with Antioxidants for the injection moulding process. The product features an outstanding Environment Stress Crack Resistance (FNCT), good chemical resistance in combination with an excellent low temperature impact resistance. Typical processing is injection moulding.
