Petrothene NA204000

Low Density Polyethylene

Product Description

Petrothene NA204000 is selected by customers for use in both extrusion coating and injection molding applications. NA204000 is a high speed, lightweight coating resin for use with paper, films and other base stocks. This resin can be extruded at line speeds of 1200 ft/min or higher. Products made from materials coated with NA204000 typically include general-purpose flexible packaging and snack food packaging. NA204000 yields excellent adhesion and heat sealing characteristics and low neck-in. When NA204000 is used in injection molding applications, it exhibits an excellent balance of toughness and softness, with excellent dimensional stability. Typical injection molding applications include housewares, toys, containers and novelty items.

Application	Bags & Pouches; Caps & Closures; Colour Concentrates; Food Packaging Film; Lamination Film; Sealants
Market	Flexible Packaging; Rigid Packaging
Processing Method	Extrusion Coating; Injection Molding
