

**SAFETY DATA SHEET**

according to Regulation (EC) No. 1907/2006

**Moplen EF300N**

Gen. Variant: SDS\_AT

Version 1.4

Revision Date 04/03/2020

Print Date 01/07/2022

SDS No.: BE13069

**1. Identification of the substance/mixture and of the company/undertaking**

**1.1 Product identifier**

Trade name : Moplen EF300N  
 Synonyms : Ethylene-Propylene copolymer, 1-Propene-Ethylene-Copolymer  
 Substance name : 1-Propene, Polymer with Ethene  
 Substance No. : 9010-79-1  
 Chemical characterization : Polypropylene copolymer

**1.2 Relevant identified uses of the substance or mixture and uses advised against**

Identified uses : Manufacture of plastic articles by injection molding, extrusion or other conversion process.  
 Prohibited uses : FDA Class III medical devices; European class III medical devices; Health Canada class IV Medical Devices; Applications involving permanent implantation into the body; Life-sustaining medical applications

**1.3 Details of the supplier of the safety data sheet**

<b>Company</b>	<b>Registration number</b>	<b>Telephone</b>
Basell Sales & Marketing Company B.V. Delftseplein 27E 3013 AA Rotterdam Netherlands	NA	31 (0) 10 275 55 00
E-mail address	: product.safety@lyb.com	
Responsible/issuing person		

**1.4 Emergency telephone number**

Basell Sales & Marketing Company B.V. +32 3 575 1235

**Poison Center:**

Gesundheit Österreich GMBH  
 AT: +43 1 406 43 43  
 24 hours all days

**SAFETY DATA SHEET**

Gen. Variant: SDS\_AT

Version 1.4      Revision Date 04/03/2020      Print Date 01/07/2022      SDS No.: BE13069

**2. Hazards identification**

**2.1 Classification of the substance or mixture**

**Classification (REGULATION (EC) No 1272/2008)**

Not a hazardous substance or mixture according to the Globally Harmonized System (GHS).

**2.2 Label elements**

**Labeling (REGULATION (EC) No 1272/2008)**

Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

**2.3 Other hazards**

May form combustible dust concentrations when suspended in air.  
 May decompose releasing irritating and toxic gases.  
 This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT) or very persistent and very bioaccumulative (vPvB).

**3. Composition/information on ingredients**

**3.1 Substances**

Chemical nature : Substance

**Components**

Chemical name	CAS-No. EINECS-No. / ELINCS No./EC-No.	Weight %	Component Type
1-Propene, Polymer with Ethene	9010-79-1	100.0 %	

**4. First aid measures**

**4.1 Description of first-aid measures**

General advice : Take proper precautions to ensure your own health and safety before attempting rescue and providing first aid.

SAFETY DATA SHEET

according to Regulation (EC) No. 1907/2006

**Moplen EF300N**

Gen. Variant: SDS\_AT

Version 1.4

Revision Date 04/03/2020

Print Date 01/07/2022

SDS No.: BE13069

- If inhaled : Remove person to fresh air. If signs/symptoms continue, get medical attention.  
In case of excessive inhalation of fumes that may be generated during heating of this material, move the person to fresh air.  
Obtain medical attention.  
Keep person warm, if necessary give Cardio-Pulmonary Resuscitation (CPR)
- In case of skin contact : If molten material contacts the skin, immediately flush with large amounts of water to cool the affected tissue and polymer.  
Do not attempt to peel polymer from skin as this will remove the skin.  
Obtain immediate emergency medical attention if burn is deep or extensive.
- In case of eye contact : Flush eyes thoroughly with water for several minutes and seek medical attention if discomfort persists.  
  
: In case of eye contact with molten polymer:  
Continuously flush eye(s) with cool running water for at least 15 minutes.  
Beyond flushing, DO NOT attempt to remove the material adherent to the eye(s).  
Immediately seek medical attention.
- If swallowed : Adverse health effects due to ingestion are not anticipated.

**4.2 Most important symptoms and effects, both acute and delayed**

- Symptoms : Inhalation of process fumes and vapors may cause soreness in the nose and throat and coughing.
- Hazards : Dust contact with the eyes can lead to mechanical irritation.  
Molten polymer may cause thermal burns.

**4.3 Indication of any immediate medical attention and special treatment needed**

- Treatment : Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient.

**SAFETY DATA SHEET**  
 according to Regulation (EC) No. 1907/2006

Version 1.4      Revision Date 04/03/2020      Print Date 01/07/2022      SDS No.: BE13069

**5. Fire-fighting measures**

**5.1 Extinguishing media**

Suitable extinguishing media : SMALL FIRE:  
 Use dry chemical, CO<sub>2</sub>, or water spray.

: LARGE FIRES:  
 Use water spray hose nozzles from a safe location.

Unsuitable extinguishing media : None known.

**5.2 Special hazards arising from the substance or mixture**

Specific hazards during fire fighting : Keep away from heat and sources of ignition.  
 Dust particles from this product are combustible particulate solids that present a flash fire or explosion hazard when suspended in air.  
 Polymer dust layer melts on the hot surface before ignition can occur  
 In case of fire hazardous decomposition products may be produced such as:  
 Carbon monoxide, carbon dioxide and unburned hydrocarbons (smoke).

**5.3 Advice for firefighters**

Special protective equipment for fire-fighters : Wear approved positive pressure self-contained breathing apparatus and firefighter protective clothing.

Further information : Combustible particulate solid, will decompose under fire conditions.  
 Calorific Value: 8000 - 11000 kcal/kg  
 Fight fire from safe distance with hose lines or monitor nozzles.  
 Heat from fire may melt, decompose polymer, and generate flammable vapors.  
 Move containers from fire area if it can be done without risk.  
 Evacuate immediately in the event of opening of storage container pressure relief devices or discoloration of container.  
 Always stay away from tanks engulfed in fire.  
 Do not attempt to get on top of storage containers involved in fire.  
 Cool storage containers with large volumes of water even after fire is out.

**SAFETY DATA SHEET**

according to Regulation (EC) No. 1907/2006

**Moplen EF300N**

Gen. Variant: SDS\_AT

Version 1.4

Revision Date 04/03/2020

Print Date 01/07/2022

SDS No.: BE13069

**6. Accidental release measures**

**6.1 Personal precautions, protective equipment and emergency procedures**

Personal precautions : Equip responders with proper protection.  
 Creates dangerous slipping hazard on any hard smooth surface.  
 Equip emergency responders with proper personal protective equipment (PPE)  
 Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).  
 Potential combustible dust hazard.  
 Polymer particles create slipping hazard on hard smooth surfaces.

: May Contain trace amounts of light hydrocarbons, compounds of oxidation, aldehydes and acids

**6.2 Environmental precautions**

Environmental precautions : Do not flush into surface water or sanitary sewer system.

**6.3 Methods and materials for containment and cleaning up**

Methods for containment / Methods for cleaning up : On land, sweep/shovel into suitable disposal containers or vacuum using equipment which avoids ignition risk.  
 On water, material is insoluble; collect and contain as any solid.  
 All recovered material should be packaged, labeled, transported and disposed of or reclaimed in conformance with applicable laws and regulations and in conformance with good engineering practices. Reclaim where possible.

**7. Handling and storage**

**7.1 Precautions for safe handling**

Advice on safe handling : Avoid dust accumulation in enclosed space.  
 Use dust collection systems designed in accordance with ATEX 95.

**SAFETY DATA SHEET**

according to Regulation (EC) No. 1907/2006

**Moplen EF300N**

Gen. Variant: SDS\_AT

Version 1.4

Revision Date 04/03/2020

Print Date 01/07/2022

SDS No.: BE13069

Avoid generating dust; fine dust suspended in air and in the presence of an ignition source is a potential dust explosion hazard.  
 Polymer dust layer melts on the hot surface before ignition can occur  
 Hot surface temperature shall be limited to less than 270°C to avoid direct ignition of a dust cloud.  
 Static discharge (spark), or other ignition sources, in high dust environments may ignite the dust and result in a dust explosion  
 Electrostatic charge may build during conveying or handling. Equipment handling polymer should be conductive and grounded (earthed) and bonded.  
 Metal containers involved in the transfer of this material should be grounded and bonded.  
 All electrical equipment should conform to applicable electric codes and regulatory requirements for areas handling combustible dusts.  
 After handling, always wash hands thoroughly with soap and water.  
 When bringing the material to processing temperatures vapors may develop may condense in the exhaust ventilation. See section 10.

: Refer to ATEX 95 and ATEX 137 and related Harmonized European Standards: EN 1127-1 (Explosive atmospheres – Explosion prevention and protection).

Fire-fighting class : Polymer will burn but does not easily ignite.

**7.2 Conditions for safe storage, including any incompatibilities**

Requirements for storage areas and containers : Store in a dry location.  
 Use good housekeeping practices during storage, transferring and handling. Process enclosures and adequate ventilation should be used to avoid excessive dust accumulation.  
 Degradation can occur because of exposure to temperature, light and oxidizing agent: trace amounts of light hydrocarbons, compounds of oxidation, aldehydes and acids can be generated.  
 Store away from excessive heat and away from strong oxidizing agents.  
 Keep container closed to prevent contamination.  
 Take measures to prevent the build up of electrostatic charge.

: Maximum allowed storage temperatures of 50°C for maximum

60 days.  
 Avoid direct insufflation of air.  
 Avoid direct sunlight and contact with sources of heat.  
 Store either in the closed original containers in well ventilated area or in silos with vents.

: Avoid temperatures above 140 °F, direct sunlight and contact with sources of heat.  
 Store either in the closed original containers in well ventilated area or in silos with vents.

**7.3 Specific end use(s)**

: See Section 1.2.

**8. Exposure controls/personal protection**

**8.1 Control parameters**

**Ingredients with workplace control parameters**

**Occupational Exposure Limits**

Components	CAS-No.	Type	Limit Value	Basis Revision Date	Additional Information
Materials that can be formed when handling this product: Non-specified (inert or nuisance) dust		TWA	10 mg/m3 inhalable	US (ACGIH) 2005	
Materials that can be formed when handling this product: Non-specified (inert or nuisance) dust		TWA	3 mg/m3 respirable	US (ACGIH) 2005	

Consult local authorities for acceptable exposure limits.

**8.2 Exposure controls**

**Engineering measures**

In accordance with ATEX 137, follow the recommendations in EN 1127-1(Explosive atmospheres – Explosion Prevention and protection).

Follow the recommendations in international standard NFPA 654 (as amended and adopted) for equipment used to handle this product.

Engineering controls, i.e. enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used.

Equipment and vessels handling combustible dust from this material should be designed to either prevent dust explosions (inerting) or safely vent dust explosions per ATEX 95 and related Harmonized European Standards.

Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

**Personal protective equipment**

- Respiratory protection : Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits.  
When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.  
Use appropriate respiratory protection where atmosphere exceeds recommended limits.  
Where workers could be exposed to dust concentrations above the exposure limit they must use appropriate certified respirators.
- Hand protection : Wear gloves that provide thermal protection where there is a potential for contact with heated material.
- Eye and face protection : Dust service goggles should be worn to prevent mechanical injury or other irritation to eyes due to airborne particles which may result from handling this product.
- Skin and body protection : Wear suitable protective clothing.
- Hygiene measures : Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the

hazards and/or potential hazards that may be encountered during use.  
 Use good personal hygiene practices.  
 Wash hands before eating, drinking, smoking, or using toilet facilities.  
 Take off contaminated clothing and wash before reuse.

**Environmental exposure controls**

General advice : See section 6.

**9. Physical and chemical properties**

**9.1 Information on basic physical and chemical properties**

- Appearance : Powders or flakes.
- Color : Translucent to white
- Odor : Slight.
- Flash point : No Data Available.
- Lower explosion limit : The minimum explosive concentration (MEC) for polymer dust varies according to particle size distribution.
- Upper explosion limit : Not applicable.
- Flammability (solid, gas) : Polymer will burn but does not easily ignite.
- Oxidizing properties : Not considered an oxidizing agent.
- Autoignition temperature : > 300 °C
- Decomposition temperature : not determined
- Melting point/range : 50 - 170 °C
- Boiling point/boiling range : Not applicable.
- Vapor pressure : Not applicable.
- Density : < 1 g/cm<sup>3</sup>

Water solubility : Insoluble.

Partition coefficient: n-octanol/water : No Data Available.

Viscosity, dynamic : Not applicable.

Relative vapor density : Not applicable.

Evaporation rate : Not applicable.

Explosive properties : No Data Available.

**9.2 Other information**

Other information : No additional information available.

**10. Stability and reactivity**

**10.1 Reactivity**

No known reactivity hazards.

**10.2 Chemical stability**

Stable under normal conditions.

**10.3 Possibility of hazardous reactions**

Hazardous reactions : Will not occur.

**10.4 Conditions to avoid**

Conditions to avoid : Avoid contact with strong oxidizers, excessive heat, sparks or open flame.

**10.5 Incompatible materials**

Materials to avoid : Material may be softened by some hydrocarbons.

**10.6 Hazardous decomposition products**

Hazardous decomposition products : Not expected to decompose under normal conditions.
