## Additional information

Processing Notes

### Pre-Drying

*Please allow time for resin to reach drying temperature. Insure filter element is clean and there is sufficient air flow (>1 ft/sec. space velocity) across surface of pellets Extended drying at 300 °F (150 °C) up to 24 hours will not harm resin. Hopper dryers with dual desiccant cartridges (one active while the other is regenerating) are highly recommended.*

Drying Conditions using Dehumidified Hopper Dryer Dew point of dried air should be -40 °F (-40 °C) or below
