## HOSTAFORM®

POM copolymer

Easy flowing Injection molding type for precision molded parts and thin-walled molded parts with high rigidity, hardness and toughness; good chemical resistance to solvents, fuel and strong alkalis as well as good hydrolysis resistance; high resistance to thermal and oxidative degradation. With UV Additives and a high amount of carbon black . Ranges of applications: automotive engineering, especially out door applications

### Product information

|                      |       |           |
|----------------------|-------|-----------|
| Resin Identification | POM   | ISO 1043  |
| Part Marking Code    | >POM< | ISO 11469 |

### Rheological properties

|                              |                           |                 |

| Special characteristics | U.V. stabilised or stable to weather |

### Additional information

Processing Notes

#### Pre-Drying

Drying is not normally required. If material has come in contact with moisture through improper storage or handling or through regrind use, drying may be necessary to prevent splay and odor problems.

#### Storage

The product can then be stored in standard conditions until processed.
