
RITEFLEX® 100AB - TPC

Description

Riteflex 100AB is a Riteflex masterbatch designed as nucleant concentrate

to facilitate demolding of very soft Riteflex grades (typical let-down ratio 1:100 – 1:50 for nucleation purpose),

as well as anti-block concentrate for the film processing of natural Riteflex TPC-ET grades (typical let-down ratio is 1:25 for film processing).

Thermal properties	Value	Unit	Test Standard
Melting temperature, 10°C/min	170	°C	ISO 11357-1/-3
